CARGO STRIKER

Use and materials...

Cargo Striker is used to protect your cargo during transit.

Cargo Striker is equipped with a patented valve, which allows very quick inflation. The valve is simple and easy to use.

Cargo Striker consists of two outer layers of special high wet-strength paper, ensuring maximum strength and low weight of the airbag.

On the inside a layer of high quality coextruded PE film, ensuring an ultimate airtight seal.

More than 40 year experience in the development and production of airbags for exporters all over the world

Striker system offers a number of advantages...

- Fastest inflation times in the market
- Takes advantage of venturi inflation
- Automatic closure after inflation – no loose parts
- Very low noise level during inflation compared to other systems
- Safety for the operator – option of digital inflator to measure internal working pressure
- Portable solution for inflation where no airline is possible

ISO 9001
CERTIFIED

AR43

Size in cm	85x120	85x185	120x220
Item number	715035	715050	715094
Pcs. per carton	35	30	20
Pcs. per pallet	280	240	160

Size in cm	85x120	85x185	120x220	
Load in tons in a gap of:	10 cm	5.0	8.2	13.4
	20 cm	2.6	5.9	9.0
	35 cm	0.9	1.8	3.3
	45 cm			2.7
Max. gap in cm:	37	37	55	

Airbags from Bates Cargo-Pak...

- Can withstand up to 90% relative humidity (RH) at 60°C.
- Have a very high wet strength due to the complete unique choice of materials and composition
- Entirely made from environmentally friendly materials
- Very user friendly due to their light weight, inflation tools and valve systems
- Can be used in all climatic conditions
